

2026 Call for Salmon Habitat Project Applications

The Salmon Recovery Funding Board awards grant funds to protect and restore salmon habitat in Washington State. Applicants must submit proposals to their local Lead Entity for evaluation before the Salmon Recovery Funding Board considers a project for funding. For projects located in Water Resources Areas 29b, 30, and 31, the designated Lead Entity is the Klickitat County Lead Entity.

Eligible applicants include cities, counties, state agencies, private landowners, native american tribes, non-profit organizations, conservation districts, special purpose districts and regional fisheries enhancement groups

Eligible project types include acquisition, restoration, planning and combination Projects (i.e. acquisition and restoration) of high priority within the designated Lead Entity area, with all project types having their own specificities and allowable sub-project types, such as riparian, design, etc. Additionally, riparian projects funded through the Climate Commitment Act that fit the qualities of the above project types will also be eligible for funding. For more information on allowable projects please consult either the Klickitat County Natural Resources Department, or the Washington State Recreation and Conservation Office.

Complete applications are due to the Klickitat Lead Entity no later than April 10, 2026. Additional requirements also apply.
